

Installing OpenAFS in Windows 10

Step 1: Open the browser and access <https://www.auristor.com/openafs/client-installer/>. Click in the yellow box below “**Windows Installer (64-bit)**” to download the installer.

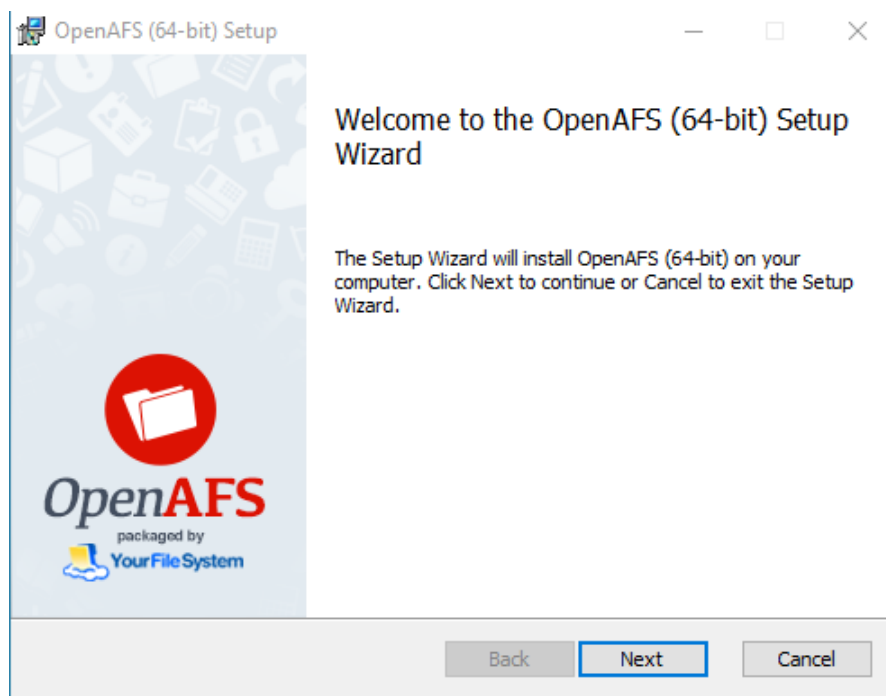

The screenshot shows a web browser window with the URL [auristor.com/openafs/client-installer/](https://www.auristor.com/openafs/client-installer/). A yellow cookie consent banner is at the top, with a "CONTINUE USING SITE" button. Below the banner, there is a paragraph: "This installer contains all OpenAFS components in one easy to install package. It is distributed for free, however no technical support is provided." Another paragraph follows: "It is recommended to verify the correct bit version of your system before downloading. Alternately, you can view all [available installers](#)." There are two main sections for installers. The first is "Windows Installer (64-bit)" with a "Release Notes" link and a yellow button labeled "yfs-openafs-en_US-AMD64-1_7_3301.msi" which is highlighted with a red border. The second is "Windows Installer (32-bit)" with a "Release Notes" link and a yellow button labeled "yfs-openafs-en_US-i386-1_7_3301.msi".

Step 2: Click “Skip this step” to start downloading the installer.

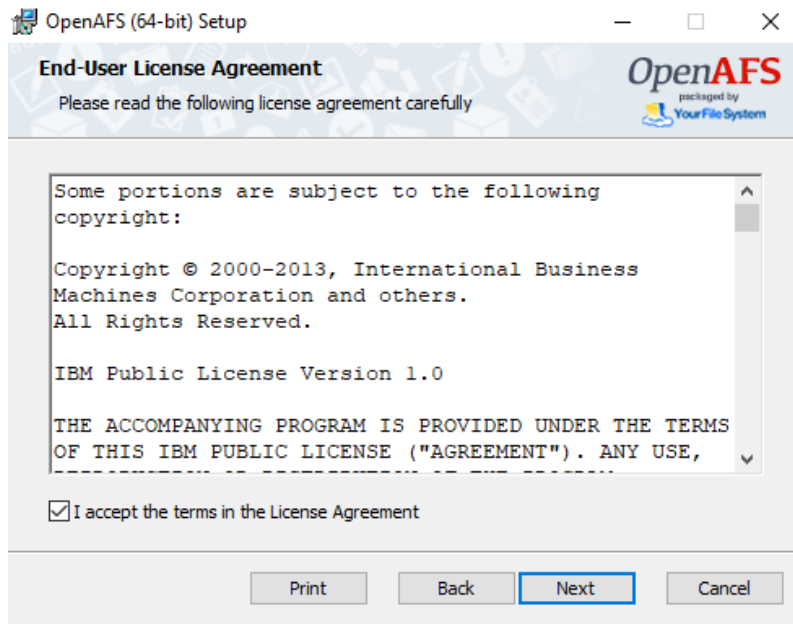

The screenshot shows a web browser window with the URL `auristor.com/openafs/client-installer/`. The page title is "OpenAFS Client Installer". Below the title, there is a question: "Would you like to register your product?". A paragraph explains that registration is optional but provides updates. Below this are several input fields: "First Name", "Last Name", "Company/Organization", "Email", "AFS Cell Name", and "Software Version". The "Software Version" field is pre-filled with "yfs-openafs-en_US-AMD64-1_7_3301.". At the bottom, there are two buttons: a yellow "REGISTER NOW" button and a blue "Skip this step" button.

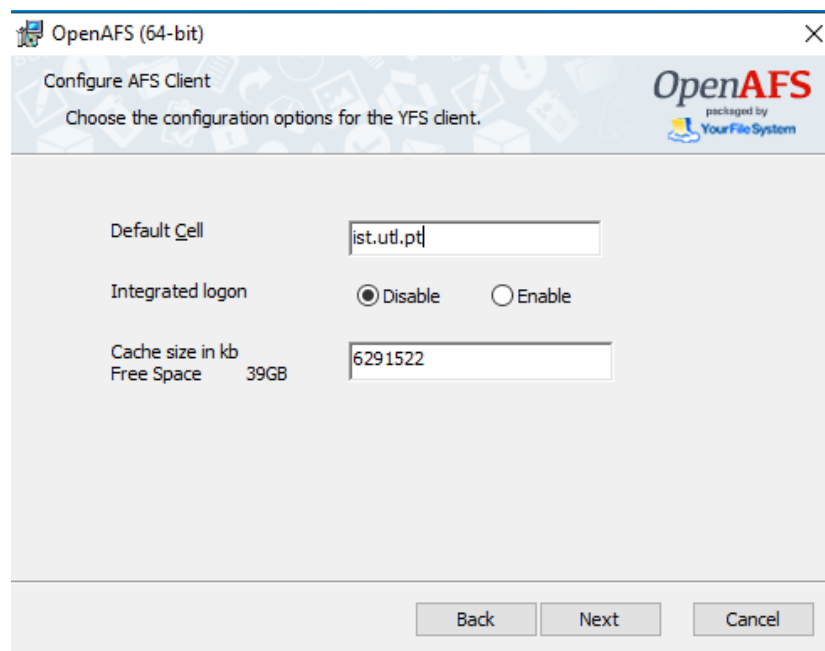

Step 3: Once the download is finished, click in the installer. Click “Next”.

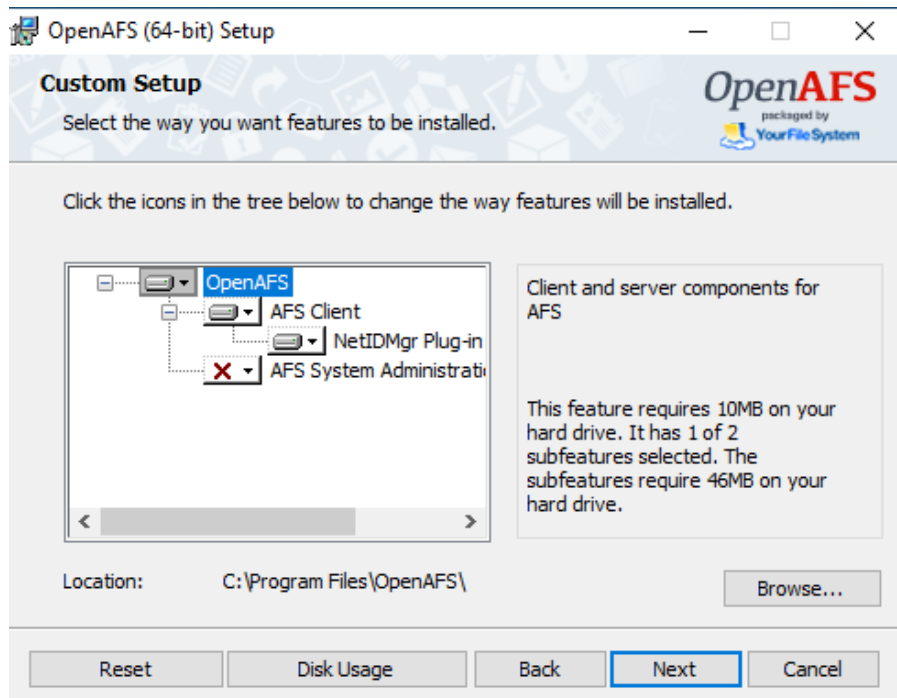

Step 4: Choose the option "I accept the terms in the License Agreement" and then click "Next".

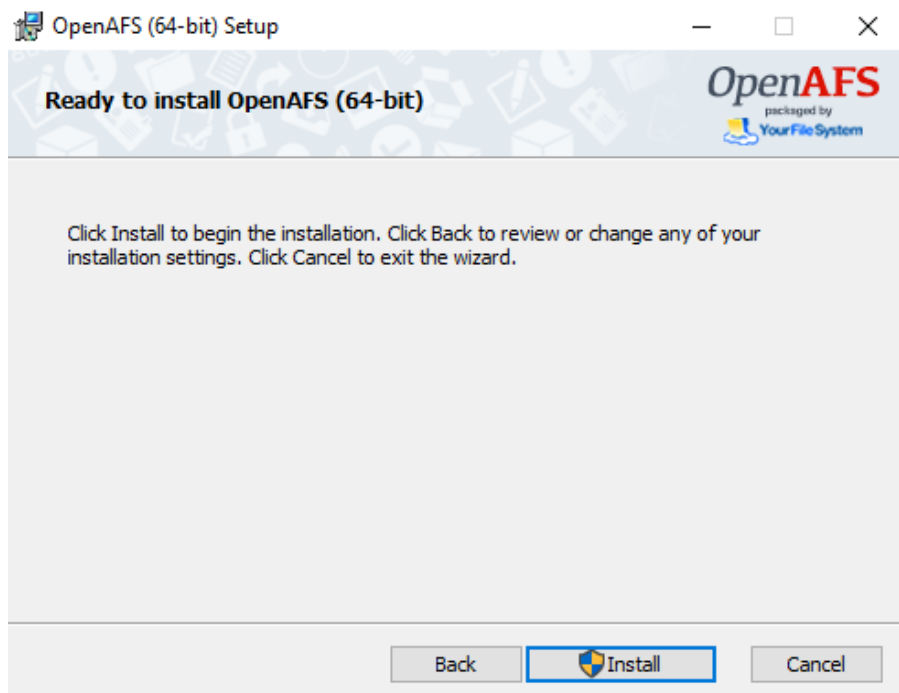

Step 5: Fill the field "Default Cell" with `ist.utl.pt` . Click "Next"

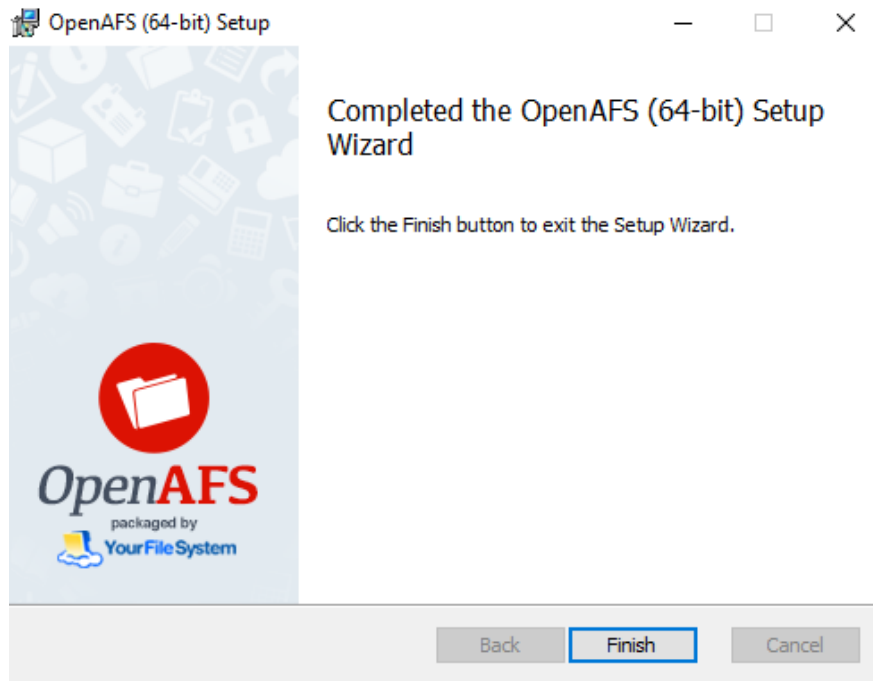

Step 6: Click "Next".

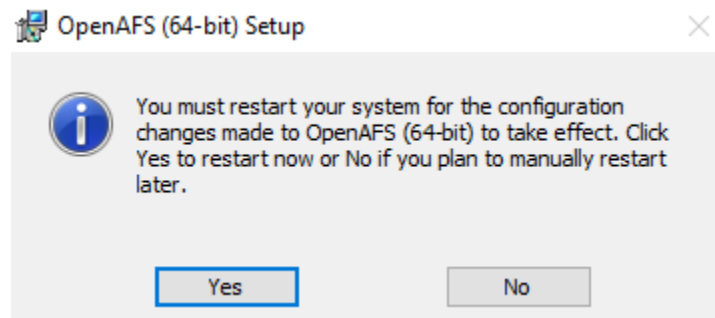

Step 7: Click "Install" to start the installation process.

Step 8: Once the installation is finished, click "**Finish**".

Step 9: After the installation is concluded, it is requested that the user restarts the system. It is recommended to restart the system, by clicking "**Yes**".

At this point, the AFS client is installed in the system.
